WILD FLOWERS OF NEW YORK

This series of 264 colored plates are reprinted from the plates used in the work entitled: "*Wild Flowers of New York*," issued as volumes 1 and 2 of New York State Museum Memoir 15.

These plates represent the more common and conspicuous members of the State Flora, the full descriptive account of which may be found in the volumes referred to. On each of these plates are given the common and the scientific names of the species, but in the index following herewith the scientific names are omitted, as the flowers are generally best known by their common names.

If further information is desired concerning the State Museum Memoir referred to, application may be made to the Director of the State Museum.
